TECHNICAL SPECIFICATIONS
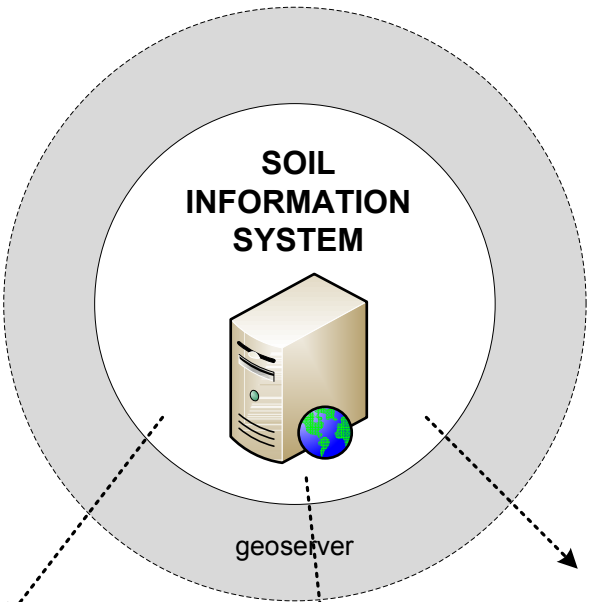

Content, scale, spatial detail, input datasets

Price / IP license

Data format

Software required to use the data

Support / contact

SOIL INFORMATION SYSTEM

geoserver

QUALITY CONTROL

Attribute and thematic accuracy

Adequacy and consistency

Geographical coverage and completeness

Completeness and accuracy of metadata

Data integrity and interoperability

Accessibility and data sharing capacity

Decision makers

How reliable is it?

What does it mean/represent?

How much does it cost?

What are the production costs?

Farmers, agricultural extension

What is its added value?

How to use to increase profit?

GIS modellers / developers

How to use it?
In which format is it?

Does it require transformation?

Is it up to date?
